Election/Restrictions

Claims 15-18 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 12/13/06.

Drawings

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: 58a referred to on page 7 of the specification. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

The disclosure is objected to because of the following informalities: On page 5, paragraph 0018, line 5, it is unclear as to how the maximum power output can be 0 watts. In paragraph 0019, line 1, "receiver 46" should be "receiver 48". In paragraph 0022, line 3, "90" should be "90 degree". In paragraph 0022, line 5, "46" should be "48". In paragraph 0023, line 3, "table" should be "cable". In paragraph 0023, line 7, reference numeral 58a is not seen in figure 2 as disclosed. In paragraph 0027, line 5, "length (R/4) " is questioned. Appropriate correction is required.

Claim Rejections - 35 USC § 112

Claims 1-3,6-14 are rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling. A means for measuring blood flow rate from the

Art Unit: 3737

received signals critical or essential to the practice of the invention, but not included in the claim(s) is not enabled by the disclosure. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976). It is unclear as to how the device would operate as disclosed without a means for measuring blood flow rate from the received signals.

Claims 1-3,6-14 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential elements, such omission amounting to a gap between the elements. See MPEP § 2172.01. The omitted elements are: means for measuring blood flow rate from the received signals.

Allowable Subject Matter

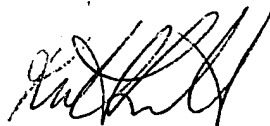

Claims 4,5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
